

M+A Matting Mat Recycling Program

Redefining Sustainability in Mat Disposal.

Welcome to our Mat Recycling Program, where we are revolutionizing the way mats are disposed of and repurposed. In collaboration with a trusted external company specializing in recycling high-caloric waste, we harness the potential of energy recovery as Solid Recovered Fuel (SRF) and Refuse-Derived Fuel (RDF).

Through this process, we transform used mats into valuable energy resources, ensuring they don't end up in landfills or contribute to environmental degradation.

Join us in embracing a greener future, where mats are recycled and repurposed, and together, let's create a world where sustainability reigns supreme.

Practical information for the mat recycling program

- + Mats need to be shipped to the following address:

Klein Frankrijkstraat 14, 9600 Ronse - Belgium

- + Mats need to be nicely stacked on pallets (pallets cannot be recuperated).
- + Mats will be unloaded from the side of the truck by a forklift.
- + M+A Matting needs to be informed about the exact date of delivery to M+A Matting (Ronse) (otherwise the mats will not be accepted).
- + M+A Matting will send the mats to a recycling company to use the mats for SRF (Solid Recovered Fuel) and/or RDF (Refuse-Derived Fuel).
- + M+A Matting will then send a certificate of recycling to our customer.
